MOHAMED AYINDE DAOUDA

Computer Engineer

daoudayinde@gmail.com | 0684106393 | Paris | https://www.daoudayinde.com/

Summary

Computer and telecommunications engineer with over 10 years of experience in large enterprise environments (banking, insurance, energy). I support complex projects combining technical management, integration, and business analysis.

Certifications

Product Owner — Avril 2020
International Scrum Institute

Education

EFFREI — Master • Ingénieur
Computer and Telecommunications Engineer — Villejuif • Promo 2014

ETS of Montréal — BAC +3
Software Geniuses — CANADA • 2012-2013

Staffordshire University — BAC +2
Networks and Infrastructure — Angleterre • 2011-2012

Projects

Portfolio — 2026

FlashCoder Academy — 2026

Website For learning code

Gloriam Consulting — 2025

Website for a company

Technical and functional skills

Areas of interventions	Requirements definition, Functional management, Change management, Validation and acceptance testing, Regulatory and Business monitoring, technical design, Development, Integration and deployment, technical support, technical project management, MOE/MOA Coordination, Implementation of procedures, Management of de deployments.
Keys Skills	Java, JEE, Cobol, C, C++, C#, Perl, Algorithme, JavaScript, Sql, Jasmine, HTML, CSS, PHP, Python, Swing, TypeScript,Karma, AngularJs, Reactjs, cft, MySQL, Tomcat, JBoss, Git, SVN, Winscp,
Methodologies	Cycle en V, TDD, Cycle itératif, SCRUM, UML, BPMN, MVC, Singleton
Network & OS	TCP/IP, Active Directory, Windows, Unix, Linux, cloud

Experience

LA BANQUE POSTALE ISSY-LES MOULINEAUX
Tech Leader - Web Intégrator March 2023 – March 2026

- Definition of the appropriate solution with the business,
- Testing and Packaging the new version of ODM in DEV with the IT teams,
- Deployment of new versions of ODM on the different DEV and non-production environments,
- Coordination for deployment in PROD environment between business teams, sécurity, Networks,
- Implementation of validation tests with the business,
- Implementation and implementation of the turnkey project for the deployment of rules via POP tools (Gitlab, DLU, XLDeploy, XLRelease),
- Management of errors linked to flow coding,

TECHNICAL ENVIRONNEMENT: Windows server, Unix, UNIX/JBOSS, cobol, scrum, java, outils de deploiement, WinSCP, FileZilla, IHM, Postgresql, Oracle, Jira, Gitlab, DLU, XLDeploy, XLRelease, ADD, Powershell, python, Microservices, API, Terraform, Ansible, Ruby, kubectl,.

BNP Paribas PANTIN
Technical Project Coordinator May 2018 – March2022

- Definition of the appropriate solution with business and application support,
- Coordination for the coding of firewalls flows and openings following the protocols of BPSS,
- Implementation of validation tests with clients,
- Coordination of the resolutions part of coding bugs,
- Coordination and environmental change planning at BNP and its customers,
- Managing the impact of infrastructure changes at the customer,
- Handling problems related to file transfer (observability tools and logs,etc...).

TECHNICAL ENVIRONNEMENT: Windows 7,10, server 2008, Unix, CFT, SFTP, FTP, FTPs, C#, SQL, Scrum, cycle en V, WinSCP, FileZilla, IHM, ServiceNow, Jira, 2stract, deplhes, idelphes, Wiki, HTML, CSS, TDF, Zabbix, Infra Z/OS, Azure

FUNCTIONAL ENVIRONNEMENT: Project management, coordination of IT, network and cybersecurity teams, management of processing deadlines, documentation management

AXA assurance La DEFENSE
Tech Leader - Web Intégrator Juin 2017- Mai 2018

- International application integration and deployment (Italy, Japan, Spain, Singapore),
- Software adaptation to entity needs and deployment and versioning management,
- Defining requirements with the software vendor,
- Prioritizing all identified and documented user stories in the Product Backlog,
- Managing development teams for ancillary tools (reporting, statistics, etc.) to complement the offering to entities and analyzing security and performance issues,
- Discovering the role of a Business Analyst.

TECHNICAL ENVIRONNEMENT: Jdk 8, JEE, Java, TOMCAT, SVN, postman, scrum, javaScript, nodejs, mysql, sql management studio, sql server configuration manager, Script batch, Spring, powershell, SOAP UI, Angular js, reac js, Admin tool, testing tools, test harness, EPOP, Openl

FUNCTIONAL ENVIRONNEMENT: Contribute to the digitalization of customer journeys (online subscription), participate in automation projects (RPA, automated workflows), implement new insurance products or new pricing structures, collaborate on projects to improve customer relations (CRM, customer portals, etc...)

TOTAL OPERATION La DEFENSE

Production Engineer juin 2015-Mai 2017

- Implementation and monitoring of request processing procedures, Development, Testing, Decompilation and debugging of C# code,
- Production monitoring, change management (CAB), documentation
- Batch/PowerShell automation scripts
- Application deployments, business flow monitoring
- Setup of the production and integration servers,
- Deployment of a customer management tool (3000 POS and 1000 TPI), Implementation of data flows (PushPrice, Automatic Price Change),
- Training of support teams, Level 3 Support Manager.

TECHNICAL ENVIRONNEMENT: C#, visual studio, script (Batch), Vmware, SQL, SQL server, Borne Wincor, TPI Tokhein, Active Directory, Windows (xp,7,10, serveur 2012), Microsoft office, Netop (ip, tcp/ip), MédiaContact, teamViewer, FileZillaPortable, VNC, Xfb, Disam, Omega, ITSM, quality center, VPN SSL

DXC Technology La DEFENSE

Software Engineer March 2014 - June 2015

Within the architecture division of CSC as a Java JEE developer engineer within the framework of the Immochan and Pharos projects on behalf of clients: CEGEDIM and the group NGE. Below are my different tasks:

Immochan	Pharos
• Design and development of new modules in java JEE, • Proposal and presentation of new functionalities and modules, • Unit tests with the Junit framework and Mock • Functional tests and integration tests, • Installation and configuration of the tomcat application server, • Installation and configuration of the STS IDE, • Implementation of the test environment and continuous integration, • Implementation of Gerrit for the control of source code updates, • Participation in technical choices, • Implementation of the TDD (TestDriven Development) working method, • Writing of the installation and use documentation of the application. • Correction of the bugs	• Requirements gathering and analysis • Analysis of the existing, • Participation in the drafting of technical specifications, • Estimation of the project load, • Design of the applicationin UML, • Development of the application according to the agile scrum method, • Front-End development with the Angularjs framework, • Responsible for unit tests with the junit framework, • Training of part of the team on unit tests • Automation of front level tests with the Karma framework • Tool training, • Daily report on the progress of the project and my tasks

TECHNICAL ENVIRONNEMENT: Java (JEE), Maven, Spring, Strut, MVC, Boostrap, Node.js, Angular.js, Karma, Jasmin, Junit, Client/server architecture, Jira, Jenkins, sonar, Sql, Git, Oracle, Postgresql, Scrum, HmailServer, tomcat, TDD (Test driven développement), jboss, Svn

FUNCTIONAL ENVIRONNEMENT: Functional testing, regression testing, multi-browser/multi-OS testing.
