MOHAMED AYINDE DAOUDA

Computer Engineer

daoudayinde@gmail.com | +33 6 84 10 63 93 | Paris

Summary

Computer and telecommunications engineer with over 10 years of experience in large enterprise environments (banking, insurance, energy). I support complex projects combining technical management, integration, and business analysis.

Certifications

Product Owner — April 2020
International Scrum Institute

Education

EFFREI — Master's degree
Computer and Telecommunications Engineer — Villejuif • Promo 2014

ÉTS Montréal — BAC +3
Software Engineering — CANADA • 2012-2013

Staffordshire University — BAC +2
Networks and Infrastructure — United Kingdom • 2011-2012

Projects

Portfolio : www.daoudayinde.com — 2026
Technical Environment : HTML5, CSS3, JavaScript, Chatbot, export CSV, SEO (robots.txt, sitemap.xml), Google Analytics events, GitHub Pages.

FlashCoder Academy : Website for learning to code — 2026
Technical Environment : Next.js 16, React 19, Supabase (PostgreSQL, Auth), Stripe Checkout & webhooks, Vercel, GitHub Actions.

Gloriam Consulting: website for a company. — 2025
Technical Environment : Next.js, React, TypeScript, Tailwind CSS, next-intl (FR/EN), FramerMotion, Git.

Technical and functional skills

Areas of intervention	*Requirements definition, Business analysis, Change management, Validation and acceptance testing, Regulatory and Business monitoring, technical design, Development, Integration and deployment, technical support, technical project management, MOE/MOA Coordination, Implementation of procedures, Deployment management.*
Key Skills	*Java, JEE, Cobol, C, C++, C#, Perl, Algorithms, JavaScript, SQL, Jasmine, HTML, CSS, PHP, Python, Swing, TypeScript, Karma, AngularJS, React.js, cft, MySQL, Tomcat, JBoss, Git, SVN, WinSCP.*
Methodologies	*V-model, TDD, Iterative development, SCRUM, UML, BPMN, MVC, Singleton.*
Network & OS	*TCP/IP, Active Directory, Windows, Unix, Linux, cloud.*

Experience

LA BANQUE POSTALE ISSY-LES MOULINEAUX

Tech Lead — Integration Engineer March 2023 – March 2026

- Definition of the appropriate solution with the business,
- Testing and Packaging the new version of ODM in DEV with the IT teams,
- Deployment of new versions of ODM on the different DEV and non-production environments,
- Coordination for deployment in PROD environment between business teams, *security*, Networks,
- Implementation of validation tests with the business,
- End-to-end implementation of the turnkey project for the deployment of rules via POP tools (Gitlab, DLU, XLDeploy, XLRelease),
- Management of errors linked to flow coding,

Technical Environment : *Windows Server, Unix, UNIX/JBOSS, cobol, Scrum, Java, deployment tools, WinSCP, FileZilla, IHM, PostgreSQL Oracle, Jira, GitLab, DLU, XLDeploy, XLRelease, ADD, PowerShell, Python, Microservices, APIs, Terraform, Ansible, Ruby.*

BNP Paribas PANTIN

Technical Project Coordinator May 2018 – March 2022

- Definition of the appropriate solution with business and application support,
- Coordination for the coding of firewall rules and openings following the protocols of BP2S,
- Implementation of validation tests with clients,
- Coordination of bug resolution for coding issues,
- Coordination and environmental change planning at BNP and its customers,
- Managing the impact of infrastructure changes at the customer,
- Handling problems related to file transfer (observability tools and logs, etc.).

Technical Environment : *Windows 7,10, Server 2008, Unix, CFT, SFTP, FTP, FTPs, C#, SQL, Scrum, V-model, WinSCP, FileZilla, IHM, ServiceNow, Jira, Formel, 2stract, Delphes, Idelphes, Wiki, HTML, CSS, TDF, Zabbix, Infra Z/OS, Azure.*

Functional Environment : *Project management, coordination of IT, network and cybersecurity teams, management of processing deadlines, documentation managemen*t.

AXA assurance La Défense

Tech Lead - Web Integrator June 2017 - May 2018

- International application integration and deployment (Italy, Japan, Spain, Singapore),
- Software adaptation to entity needs and deployment and versioning management,
- Defining requirements with the software vendor,
- Prioritizing all identified and documented user stories in the Product Backlog,
- Managing development teams for ancillary tools (reporting, statistics, etc.) to complement the offering to entities and analyzing security and performance issues,
- Discovering the role of a Business Analyst.

Technical Environment : Jdk 8, JEE, Java, TOMCAT, SVN, postman, scrum, javaScript, nodejs, mysql, sql management studio, sql server configuration manager, Script batch, Spring, PowerShell, SOAP UI, AngularJS, React.js, Admin tool, testing tools, test harness, EPOP, OpenL.

Functional Environment : *Contribute to the digitalization of customer journeys (online subscription), participate in automation projects (RPA, automated workflows), implement new insurance products or new pricing structures, collaborate on projects to improve customer relations (CRM, customer portals, etc...).*

TOTAL OPERATION La Défense

Production Engineer June 2015 - May 2017

- Implementation and monitoring of request processing procedures, Development, Testing, Decompilation and debugging of C# code,
- Production monitoring, change management (CAB), documentation
- Batch/PowerShell automation scripts
- Application deployments, business flow monitoring
- Setup of the production and integration servers,
- Deployment of a customer management tool (3000 POS and 1000 TPI), Implementation of data flows (PushPrice, Automatic Price Change),
- Training of support teams, Level 3 Support Manager.

Technical Environment : C#, visual studio, script (Batch), Vmware, SQL, SQL server, Borne Wincor, TPI Tokhein, Active Directory, Windows (xp,7,10, serveur 2012), Microsoft office, Netop (ip, tcp/ip), MédiaContact, teamViewer, FileZillaPortable, VNC, Xfb, Disam, Omega, ITSM, quality center, VPN SSL

DXC Technology La Défense

Software Engineer March 2014 - June 2015

Within the architecture division of CSC as a Java JEE developer engineer within the framework of the Immochan and Pharos projects on behalf of clients: CEGEDIM and the group NGE. Below are my different tasks:

Immochan	Pharos
• Design and development of new modules in java JEE, • Proposal and presentation of new functionalities and modules, • Unit tests with the Junit framework and Mock • Functional tests and integration tests, • Installation and configuration of the tomcat application server, • Installation and configuration of the STS IDE, • Implementation of the test environment and continuous integration, • Implementation of Gerrit for the control of source code updates, • Participation in technical choices, • Implementation of the TDD (TestDriven Development) working method, • Writing of the installation and use documentation of the application. • Correction of the bugs	• Requirements gathering and analysis • Analysis of the existing, • Participation in the drafting of technical specifications, • Estimation of the project load, • Design of the application in UML, • Development of the application according to the agile scrum method, • Front-End development with the Angularjs framework, • Responsible for unit tests with the junit framework, • Training of part of the team on unit tests • Automation of front level tests with the Karma framework • Tool training, • Daily report on the progress of the project and my tasks

Technical Environment : *Java (JEE), Maven, Spring, Struts, MVC, Bootstrap, Node.js, Angular.js, Karma, Jasmin, Junit, Client/server architecture, Jira, Jenkins, Sonar, SQL, Git, Oracle, PostgreSQL, Scrum, HmailServer, Tomcat, TDD (Test-driven development), JBoss, SVN*

Functional Environment : *Functional testing, regression testing, multi-browser/multi-OS testing.*
